

Hello Everyone,

The Integrated Community Energy and Climate Action Plans (ICECAP) project would like to send out a reminder to circulate the carbon calculator amongst your networks. By completing a **short, 15-minute survey**, homeowners, seasonal residents, and businesses can calculate the greenhouse gas (GHG) emissions produced by their buildings, vehicles, and waste.

ICECAP has ambitious goals in the high levels of participation we are hoping to achieve, and it will not be possible without your help.

ICECAP encourages everyone to complete the carbon calculator at: [www.gbbbr.ca/carbon-calculator](http://www.gbbbr.ca/carbon-calculator)

Thanks for your help and support!

Your ICECAP project team,

Daryle Moffatt  
ICECAP Co-Chair

Forrest Pengra
